

# LTL Airbag Recall Shipping Procedures

Airbags (BAGS) are considered a hazardous material and must be shipped according to DOT regulations. The following steps must be exactly followed to avoid incidents and violations. *NEVER SHIP AN AIRBAG VIA AIR.*

***RAS will ship all the following supplies once all airbags are invoiced:***

Insert Airbag into PINK anti-stat bag provided and close with wire tie from kit.

Place bagged airbag in box provided with kit. Then add bubble wrap or additional filling (not provided) to fill voids in the box to eliminate movement.

Place VIN tag loose in box, as shown in picture on left. Then seal box with CLEAR TAPE.

Apply one(1) class 9 Hazmat label per one(1) box, then place individual boxes together on a pallet, and either tie down or shrink wrap them down to the pallet.\*

**\*Please Note:** If you use BLACK shrink wrap, you must also place a Hazmat label on each side of the pallet, which can be downloaded from [HERE](#).

Print out two(2) copies of BOL. Attach one(1) copy to the pallet and **hand one(1) copy to the driver.**

**If directions are not followed,  
driver may refuse to take the shipment!!**

# LTL Airbag Recall Shipping Procedures

Airbags (BAGS) are considered a hazardous material and must be shipped according to DOT regulations. The following steps must be exactly followed to avoid incidents and violations. *NEVER SHIP AN AIRBAG VIA AIR.*

## Ensure that:

- It is from a VIN that has been validated
- It has NOT deployed.
- One airbag per box!

AIRBAG shipment supplies are pre-packaged as a kit and should include:

- Approved box, pink anti-static bag, zip tie, bubble wrap, and one(1) Class-9 Diamond label

Source for kits:

- RAS will send the package supplies to you once you have invoiced the airbags.
